

Our Cone Liners are made of polyethylene plastic. It covers the inner cone surface of a bucket protecting it from abrasive wearing. The complete liner consists of two or four plastic segments (depending on the size of a bucket). The segments get attached to a bucket with aluminum pop-rivets.

- Dramatically improves abrasion resistance and wear life
- Eliminates concrete "buildup"
- Can be installed on new buckets or as a "repair option"
- Available for both aluminum and steel concrete buckets

### Plastic Cone Liners

Cone Liner Model	For Buckets Models
<b>CLP-37</b>	BB-3, BB-5, BB-7
<b>CLP-115</b>	BB-10, BB-12, BB-15
<b>CLP-230</b>	BB-20, BB-25, BB-30
<b>CLP-450</b>	BB-40, BB-50
