

The components of TEMS are categorized into tentage types of which there are two height sizes: the Main and the Extended. The Main type is associated with the Breezeway and Carrefour types. All TEMS sections are made of polyester / cotton and polyvinyl chloride textile materials and meet stringent requirements for safety, durability and weather resistance.

The part number below the item name refers to the NATO Stock Number (NSN) when prefixed by "8340-21-".
